Executive Summary

The proposed Multi-Sport & Recreation Complex represents a transformative opportunity to rejuvenate the existing golf range into a dynamic, inclusive and future-ready destination for sport, leisure and community engagement. Our vision is a multi-use facility that balances active recreation, social wellbeing and economic sustainability, delivering tangible value to both the community and Council.

At its core, the project is about adaptive revitalisation: building on the range's legacy while diversifying its use through modern, accessible sports infrastructure. The redevelopment introduces pickleball courts, indoor sports simulators and enhanced community amenities, all designed to expand participation, attract diverse user groups and ensure year-round use.

From a governance perspective, our model gives Council a sustainable, low-risk partnership aligned with its vision for accessible public facilities. Our offer includes a profit-sharing arrangement, local resident discounts and scholarship initiatives that reinforce our commitment to social responsibility and community benefit.

Core Objectives

1. **Diversify recreational opportunities.** Transform a single-use golf range into a multi-sport complex offering golf, pickleball, indoor simulators and flexible space for events, classes and community activities.
2. **Enhance community accessibility.** Keep all facilities affordable, inclusive and accessible year-round, with programmes for youth, seniors and families, resident discounts and council partnership events.
3. **Foster social and economic sustainability.** Operate a social enterprise model that reinvests a portion of profits in local community initiatives, youth scholarships and skills development.
4. **Deliver environmental responsibility.** Integrate sustainable design principles such as energy-efficient systems, water-sensitive landscaping and recycled materials, for long-term environmental stewardship of the site.
5. **Strengthen partnership with Council.** Support Council's strategic objectives by reducing maintenance costs, enhancing public amenity and creating a financially responsible operating model that maximises community return on investment.

The full submission included a staged construction methodology and delivery programme, an operational and management framework, a community benefit model and completed council response schedules.
