**Wasiu S.** · Grant & Bid Writer · UK, US & Australia

Client names, people, locations, reference numbers and pricing have been removed or replaced to protect client confidentiality. Content is otherwise as written for the client.

# Question 2: Service Delivery

We have extensive experience delivering accessible, mobile-responsive websites for education, public sector and community organisations. Our work consistently focuses on clarity, inclusivity and long-term performance.

### ACCESSIBILITY AND MOBILE-FIRST DESIGN

We design with accessibility as a foundation, not an afterthought. Every project applies WCAG 2.1/2.2 standards and GOV.UK design principles for readability, navigation and assistive technology compatibility.

- Colour contrast, alt text, semantic HTML and keyboard navigation built in from the start.
- Designs tested with screen readers (NVDA and VoiceOver) and across devices from 320px upwards.
- Clear hierarchy and typography for readability and brand consistency.

### NAVIGATION BUILT AROUND THE COLLEGE'S AUDIENCES

| Audience | What they need first |
|---|---|
| **Students and parents** | Quick access to course information, events, news and support |
| **Employers** | Dedicated pathways for apprenticeships and partnerships |
| **Staff and partners** | Secure areas for updates, documentation and collaboration |

### INTEGRATION WITH COLLEGE SYSTEMS

- MIS and CRM systems through their APIs.
- Event and booking tools for open days and enrolment.
- Marketing automation and analytics dashboards.

### QUALITY ASSURANCE BEFORE LAUNCH

- Full accessibility validation to WCAG 2.2 AA.
- Speed optimisation, targeting 90+ on Google PageSpeed.
- Browser and device testing across Chrome, Safari, Edge, iOS and Android.
